NAUGUT

Hydrosoluble complementary feed in oral solution

Neonatal diarrhoea

COMPOSITION

| | |
|----------------------------------------------------------------------------------------|--------|
| Propylene glycol | 74,3 % |
| Mono, di and triglycerides of butyric acid (C4)..... | 12,1 % |
| Mono, di and triglycerides of short and medium-chain fatty acids (C3, C8 and C10)..... | 5,3 % |

Additives per litre

| | |
|--------------------------|--------|
| Lactic acid (1a270)..... | 69,5 g |
| Carvacrol..... | 11,0 g |
| Cinnamaldehyde | 11,0 g |

PROPERTIES

- Important source of butyric acid in newborns with an immature digestive system.
- Contributes to the development of intestinal villi, exerting an anti-inflammatory and stimulant of the local immune system, and reinforcing the mucosal cell junctions.
- Helps to promote intestinal eubiosis.
- The synergies between lactic acid, glycerides of medium chain fatty acids and essential oils contribute to the control of enteropathogens.
- Helps to reduce the symptoms derived from enteric processes in newborns, as well as their incidence.

INDICATIONS AND USES

Target species: Newborn piglets, calves, kids, lambs and bunnies.

Period of use: First weeks of life.

Indications: Enteric processes in newborns: prevention, treatment and convalescence.

DOSAGE AND ADMINISTRATION

To be administered orally. Apply in the mouth with the dispenser, 1 - 2 puffs (1 - 2 ml) per animal, between 24 and 48 hours of life. Repeat dose 24-72 hours later if diarrhoea appears and/or symptoms do not subside.

STORAGE

Store in a cool and dry place and protected from light.

SHELF-LIFE

24 months.

PACKAGE SIZES

250 ml vial.
